Mission-Vision-Values

MISSION: we are a reference Company in the design, manufacture and marketing of equipment for the process and energy industries, with a balance between design and integration of combustion equipment for the international market and the representation of leading brands for the national market. We provide a proven experience of **more than 60 years** in the market, offering cutting-edge solutions to our customers, providing them with added value, and generating a reasonable profit for both parties.

VISION: **People**: continue to be a good place to work, that our staff continues to feel involved and that we continue to attract talent. **Clients-Markets**: to remain a reference company, allocating our resources to **INNOVATE** and **GROW CREATIVELY** in our target industries, applying our *know-how* to new products and markets. **Partners**: maintain productive relations of collaboration with our network of agents, represented and suppliers. **Society**: increase our commitment to the **environment** by providing efficient and sustainable solutions for our target markets.

VALUES: the values we have been abiding to in all these years of activity in our Company have been: professionalism, quality, excellence, honesty, integrity, flexibility, pleasure and collaborative spirit. VALUES we strive to enhance in the future are: **COMMITMENT**, **EFFICIENCY**, **COMMUNICATION** and **SUSTAINABILITY**.

Business units

Environmentally friendly, our aim is to clean flue gas before it is released into the atmosphere, thereby helping our customers **control their emissions** and operate their plants in a **SUSTAINABLE** way. For this purpose, we put at your service *turn-key* products designed by us or under license: flares, thermal oxidizers, DeNOx systems, vapor treatment systems or vapor recovery units.

Since 1961, we **exclusively** represent, advise, select, sell, maintain and repair equipment, machines, installations and process instrumentation of the most recognized world brands in each field. Our representatives give us their trust making us the point of connection with our clients for projects of domestic and international location.

Aftermarket services

Both units have a range of aftermarket ***technical assistance SERVICES*** specialized in customer or workshop / factory and guaranteed original spare parts for all the equipment and facilities that make up our supply program. Likewise, we have a technical engineering office to carry out simulations and studies of dispersion, radiation and improvements in process efficiency.

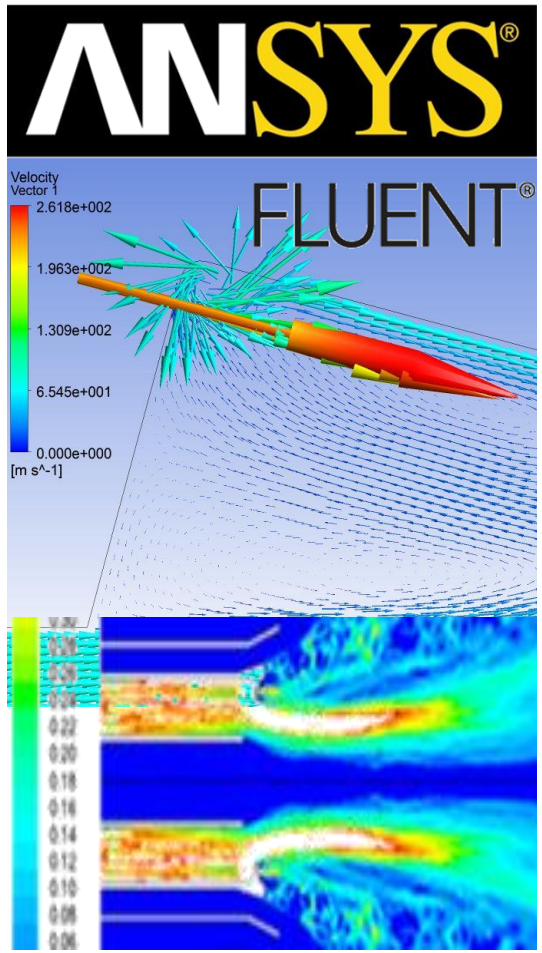
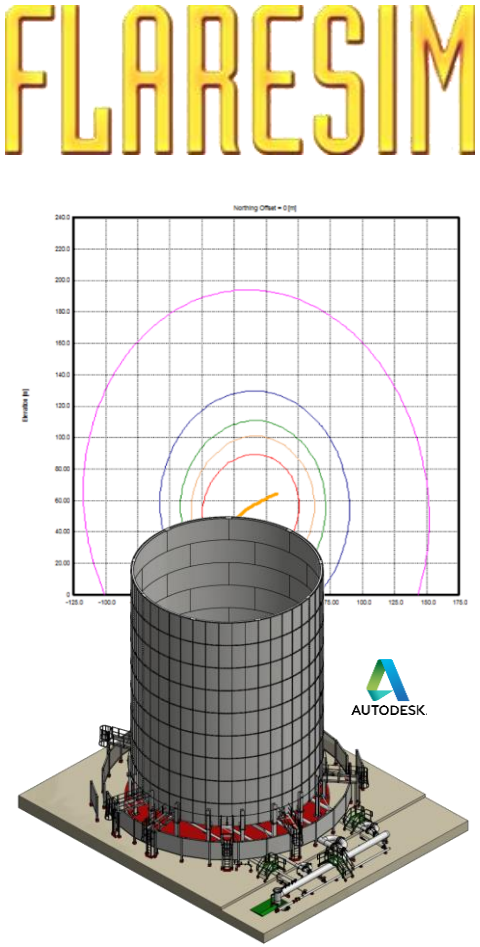
Means-Capabilities





PREMATECNICA uses for their developments ***Ansys Fluent*** software, a leading software tool that allows us to analyze the design of lifting surfaces, fuselaged bodies, interactions between them, complete configurations, ducts, vents, radiation, combustion processes, turbo-machinery, heat transfer, etc.

Moreover, we have among others, a potent supporting tool as ***FlareSim***, a world spread software which allows us the optimization of products and processes through numerical modeling.

Certifications-Homologations

In 1992, the Company already had a **Quality Assurance Manual** incorporating the suggestions of our major customers in the refining industry and nuclear.

Subsequently, the Company obtained the approval by BSI UNE-EN-ISO-9002:1994, prior to its current certification by Bureau Veritas in **design and manufacture of flares and combustion equipment, marketing and servicing of equipment, machines, instruments and systems for the process and related industries.**

The Company has, among others, **RePro certification**, as a way to comply with the provisions on classification systems set forth in law 31/2007 about procurement procedures for the water, energy, transportation and telecommunications.

Equipos e instalaciones para las industrias de proceso y energía

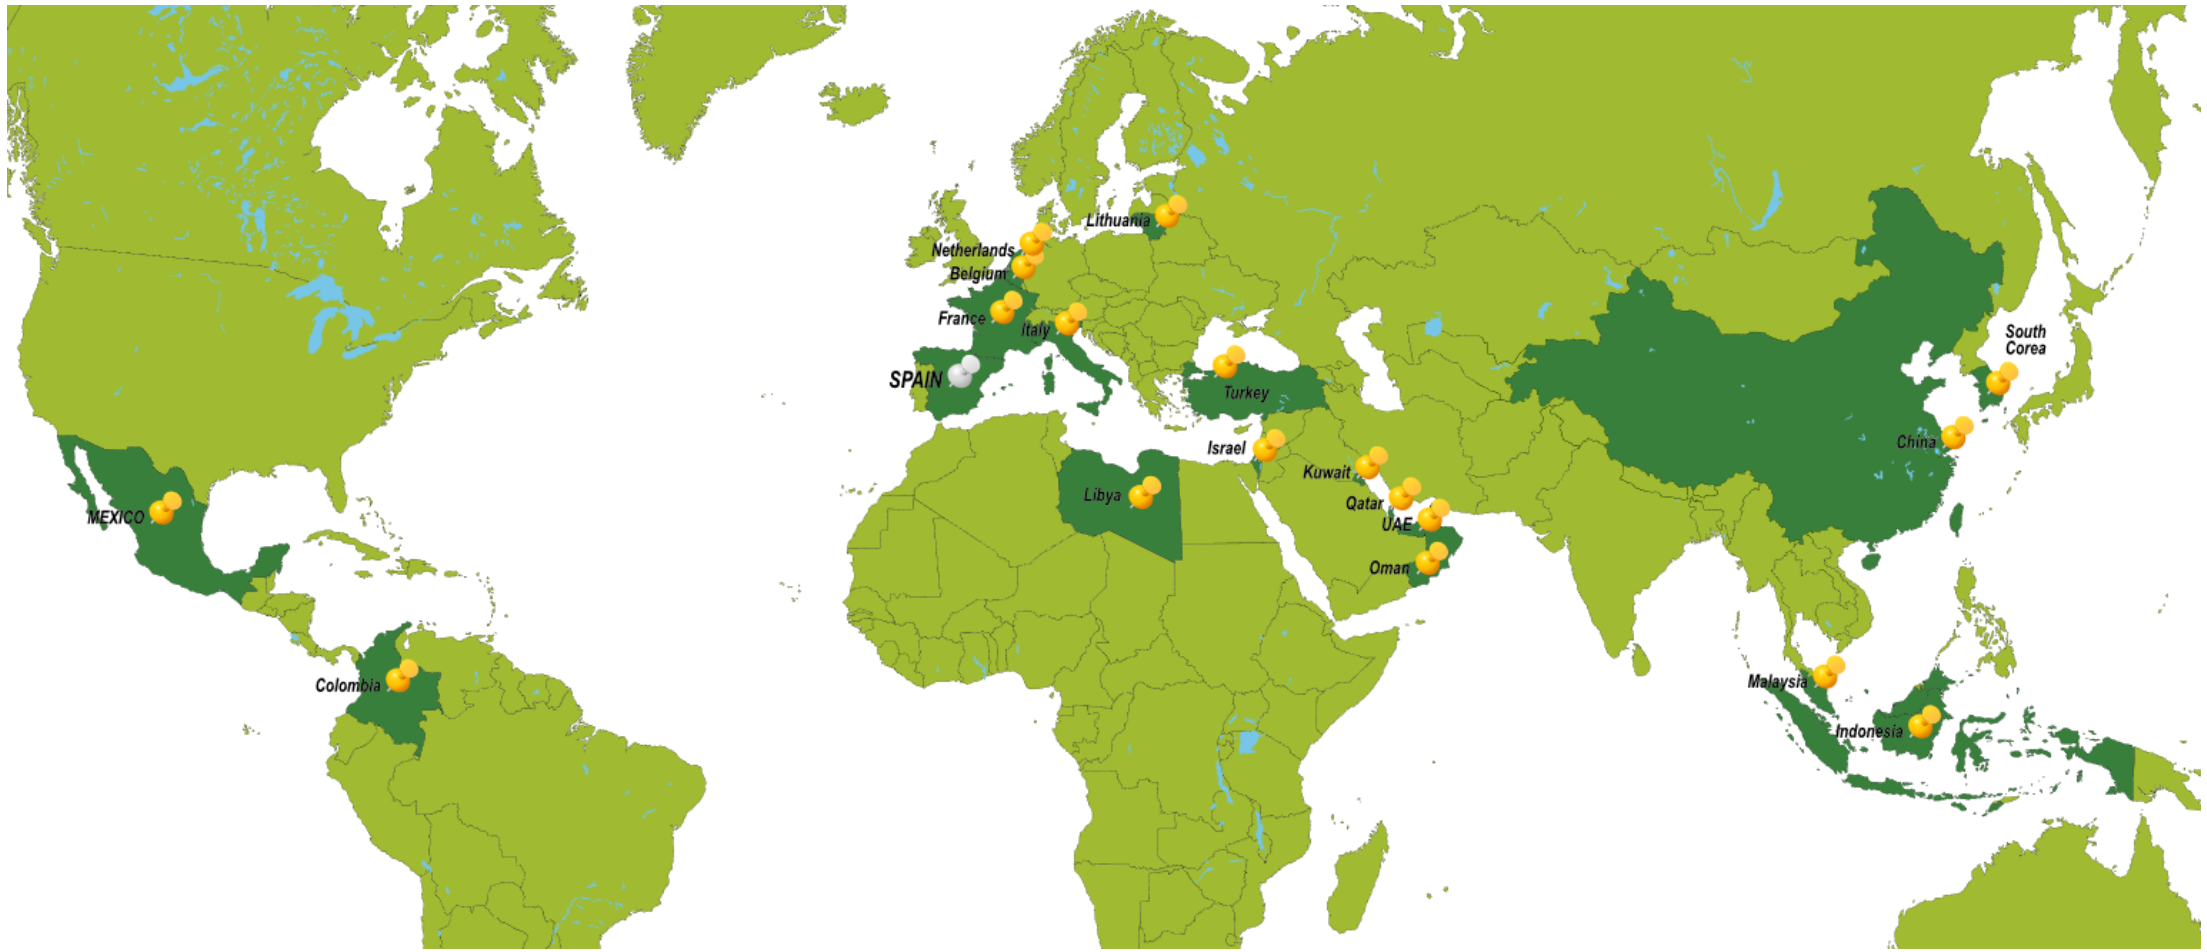
Worldwide agents



PREMATECNICA was founded in 1961 in Madrid (Spain). We started distributing, in the Spanish market, blue-chip equipment and instrumentation for the process and energy industries, starting our international expansion in 1980 with the incorporation of an associated Company in Mexico with national partners who have managed the operation of the same. This was the beginning of a new era for our Company. Today, fully engaged in a global business policy to provide effective responses to the demands of our clients, our team of experts develops a wide variety of equipment for the environment protection, energy efficiency and safety.

Since 1961...
